Dr.-Ing. Detlef Müller-Wiesner has worked since 1986 in the Aerospace Industry. He started his professional career in the space industry and did serve by 2018 to Airbus or companies which became part of Airbus. He held different positions in engineering, production, assembly-integration-test, services and program management. In 2000 he became the leader of the EADS Corporate Research Center, in 2006 he was appointed as Chief Operating Officer Innovation of the Group and before his retirement from Airbus he acted as Head of Electric Aircraft Programs. He has been Member of the Helmholtz Senate, Member of the Board of the German Center for artificial Intelligence, Board Member of other scientific organizations and President of the German Aeronautics and Space Association. He is member of the International Air und Space Academy in Toulouse.
