

## THE INTERNATIONAL COUNCIL OF THE AERONAUTICAL SCIENCES (ICAS)

ICAS was founded by Theodore von Karman in 1957 as a non-government not-for-profit scientific organization to encourage the free international exchange of information on aeronautical research and technology.

The mission of ICAS is to provide regularly scheduled events and publications that enable a better understanding of engineering science and practice and an improved level of cooperation among aeronautical engineering professionals from around the world. ICAS currently serves as the only international support organization to representative aeronautical engineering professional societies and their members in 32 countries.

ICAS functions under three primary bodies; General Assembly (meets biennially), Executive Committee (meets at least twice each year) and Programme Committee (meets annually). ICAS holds an International Congress in the fields of Aeronautical Sciences on a biennial basis. The venue is chosen by the General Assembly and changes from Congress to Congress. Furthermore ICAS organises a thematic workshop in the year between the congresses in connection with the meeting of the Program Committee.

The ICAS Secretariat is since January 2003 hosted by the Swedish Society for Aeronautics and Astronautics (SSAA) and physically located at the Swedish Defence Research Agency (FOI) in Stockholm.
